

Study Description Form: 'JAPAN'

Study Title 'Japanese General Social Surveys 2010'
Fieldwork Dates 'From Feb. 19, 2010 to Apr. 18, 2010'
Principal Investigators 'Ichiro TANIOKA and Noriko IWAI'
Fieldwork Institution 'Central Research Services, Inc.'
Population 'Men and women 20-89 years of age living in Japan'
Sampling method 'Two-stage stratified random sampling; stratified by regional block and population size'
Fieldwork Methods 'Both face-to-face interview and placement (self-administered) method'

Way the module was fielded (Check \surd)

-- as an independent survey

-- as part of a larger survey

If the module was fielded as part of a larger survey, the survey name that the EASS module was fielded with JGSS-2010

Initial Sample Size '4500'

N. of respondents '2496'

Response Rates

Total Issue	4500
Total EASS questionnaire received (1.0)	2496
Eligible, Non-interview (2.0)	1926
Refusal and break-offs (2.10)	1064
Non-contact (2.20)	691
Other (2.30)	171
Unknown eligibility (3.0)	77
Not Eligible (4.0)	1
Valid Response Rates	62.1 % (JGSS's official formula) 55.5% (N. of R. / Initial Sample Size)

Language 'Japanese'

Weighted 'Yes'

Weighting Procedure 'exact description of the weighting procedure/algorithm'

Although we did not use weighted sampling, our dataset includes a variable 'WEIGHT'. This variable adjusts the sampling error and the nonresponse bias. The distribution of respondents' sex and 10-year

age group in the weighted dataset corresponds to that of the population on October 1, 2008 which was estimated by the government based on the 2005 Census.

Known systematic properties of the sample

‘description of biases or other deviations of the sample’

Some nonresponse biases exist in the sample. The sample has fewer rates of males, youths in their 20s and 30s, and residents of big cities compared with the population.

Deviation from EASS questionnaires

‘ex. questions omitted, added, or asked in a format different from what the original questionnaires have prescribed’

This survey uses both interview and placement method. Therefore the form of questionnaire is very different from the original questionnaire. Please refer our questionnaire for details.

Publication

‘list of publications using the present data set’

Nothing at the present moment.

Remarks on the Survey

‘other county-specific aspects of the survey that need to be known’

This survey uses both interview and placement method. Therefore, the order and forms of questions differ from those of the original questionnaire. Values of some standard background variables are constructed from responses to two or more questions.

National Population Characteristics: 'JAPAN'

* Please provide the following information about known characteristics of national population from the relevant high-quality data sources, e. g., census or other government surveys. In case when a country doesn't possess relevant statistics, the country is strongly advised to provide whatever statistics that is closest to the national characteristics. Also, the groupings of each item below could possibly be country-specific, except for Gender and Employment Status.
